PROFESSIONAL SUMMARY

Enthusiastic Computer Science student with hands-on experience in front-end web development, website deployment and AI development. Skilled in graphic design and IT support, with working knowledge of Java. Experience building and deploying production websites on Shopify, Wix and Vercel, including integration of third-party APIs, AI chatbots, and e-commerce functionalities. Seeking an entry-level Software Developer role to further develop technical expertise and contribute to collaborative software engineering teams.

EDUCATION

- Bachelor of Science in Computer Science | University of Technology, Jamaica
August 2021 – Expected May 2027 | Available for Junior Roles & Internships
- High School Diploma | Cornwall College, Jamaica
September 2014 – July 2019

WORK EXPERIENCE

Solo Web Developer & Graphic Designer

Klaude Global LLC (Part-Time) | January 2026 – July 2026 | Miami, FL (Remote)

- Architected and launched a full e-commerce website using Shopify, including product catalogs, category structure, and checkout flow.
- Developed wireframes and UI/UX layouts, improving visual consistency and brand identity; achieved an 80% customer satisfaction score based on client interview.
- Integrated Shopify automated messaging and third-party communication features to streamline customer engagement, reducing overall response time by 37%.
- Executed email marketing strategies, increasing outreach and customer retention.
- Delivered structured documentation covering feature updates, technical decisions, and marketing recommendations.

Information Technology Specialist, Video Editor & Graphic Designer

Global Grain Trading Ltd. (Freelance) | January 2024 – August 2026 | Jamaica (Remote)

- Delivered remote IT support and troubleshooting for the client using TeamViewer. This reduced downtime and improved operational efficiency.
- Produced professional customer invoices using QuickBooks, ensuring accuracy, compliance and maintaining a 100% satisfaction rate from management.
- Automated repetitive data workflows using Excel formulas (VLOOKUP, IF, nested functions). This reduced manual processing time and minimized data entry errors.

Graphic Designer & Assistant Web Developer

Maxwell JA Shipping & Logistics (Part-Time) | January 2022 – January 2025 | Jamaica

- Assisted in maintaining and updating the company website with new content, features, and layout improvements.
- Produced technical documentation covering website functionality, feature updates, and digital marketing strategies.

- Technical Communication
- Problem-Solving
- Trainable
- Adaptability

PROJECTS

Likkle Wisdom:

A Jamaican cultural-based, daily quotes and affirmations app that shares authentic Jamaican Patois wisdom with clear English translations to inspire positivity, cultural pride and personal growth. This app also aims to educate tourists about Jamaican history.

Tech Stack:

- Front-end: React + Capacitor (used to wrap React code for mobile deployment)
- Backend: Supabase DB, Supabase Auth and Resend
- Hosting: Vercel and Hostinger

DKlutter:

A web-based planning and collaboration application. It brings tasks, events, reminders, calendars, Kanban boards, Markdown notes, files, and planning tools into one workspace. This software is aimed at individuals who are productivity heavy, need clear organization and a central location for planning.
